Preliminary Abandonment of Claims

Dear Patent Office,

At this current time I wish to abandon the remaining claims on my patent and only use the following below to represent my current invention.

What is claimed is :

1. Media entertainment console, an signal console can send video game applications to any room in the end users home that has a wireless RF adapter router. A RF adapter router can work independent upon receiving the game data from main console hub .Allow many end-users to play or watch movies, games, and music(any stored media) simultaneously by means of the present invention.

2. This invention includes a biometric fingerprint module that is used to identify end user to allow access to the system or stored games (saved) on hard drive.

3. This invention will be one hundred percent wireless. Being a hybrid device and media center computer, this system will work via no wires. The data from the console is transmitted from the a wireless card to any wireless RF adapter hub. By means of programming the network the system work via Wi-Fi 802.11g/b/n spectrums .The console will not be attached by wires for any game or video applications.
